MONTH - MAY | ISSUE - 06 | YEAR - 2021

SCHOOL NEWS

The month of May came and it's again a time for fun and frolic and the beginning of summer vacations, a time to spend with family and above all to involve in different activities and hobbies.

During the summer vacation our school organized various co-curricular activities e.g. Summer Fun, Dance Activity, Puppet Making; Art and Craft Activity, Eid Celebration Activity and Go Green or Eco-Club Activity. The motto of these activities was to provide children an opportunity to acquire specific skills and show and chisel their talents.

Objectives

- ▶ Strengthen Self Confidence
- ▶ Greater Opportunities
- ▶ Exposure to New Activities
- ▶ Enhance Physical and Mental Health
- ▶ Builds Sense of Responsibilities

ART AND CRAFT ACTIVITY

Through creative art, children may be able to represent experiences that they cannot verbalize. They may draw pictures out of proportion, exaggerating things that are important to them. When we value children's creativity, we help them feel valued as people, raising their self-esteem. Keeping these things in view Sarvayog International School organized an Art and Craft Activity. Summer fun day was organised for the children to give them some relief from their boredom. Our Tiny Tots enjoyed fun with colours.

Best out of Waste

Recycling is a method or procedure that includes the collection and breaking down of waste material to create something new out of it.

Reduce/Reduction: A key part of waste "**reduction**" is "conservation"—using natural resources wisely, and using less than usual in order avoid waste.

Reusing is environmental health and safety or waste prevention terminology means using an object or resource material again for either the same purpose.

VARIOUS WASTE MATERIAL USED FOR MAKING USEFUL PRODUCTS

Old Newspaper. | Notebooks and chart paper.

Cardboard and book cover. | Paper plates, spoons and disposable glass

Pens and refills. | Old CDs and DVDs. | Toothpicks and matchsticks.

Dry stem of plants and trees. | Mango seeds. | Seeds of various fruits.

Old curtains & table covers. | Used foil paper

Jute rope. | Plastic bottles. | Strings and sequences, etc.

Along with these a large number of products are also being used which are somehow felt to be useless.

VIRTUAL EID-UL- FITR CELEBRATION

DATE: 14 MAY 2021

Eid-ul-Fitr is one of the most important festivals for Muslims all over the globe. The day marks the end of the holy month of Ramadan, in which Muslims observe fast from dusk to dawn. The month-long fasting, which is considered to be one of the sternest religious practices, ends on the eve of Eid. We at Sarvayog International School, Sonela celebrated this occasion full of joy and happiness and with the spirit of brotherhood. Our school celebrated Eid through various activities. Children displayed their art, culture and various dishes in their unique way.

LET'S DANCE

Dancing is a mix of art and exercise which connects mind and body and makes one sharper and stronger. Our school organized dance classes for students of grade 1 to 8. They participated in the dance classes with great zeal. The students were very excited that they would learn new skills with their new teacher Ms Neha Prajapati. Not all can dance, our children had a gala time dancing and enjoyed it.

Other Activities

Singing

There's no better way to express your feelings other than singing. Our budding singers with their melodious voice stole the hearts of many.

Brain Train

Training of the mind activity was conducted to test and check critical thinking. It's all about how to tackle and deal with a situation and understand the various prospective. Our senior kids participated in this Mind Trap Reasoning) activity.

Talk Master

Talk Master's are shows that speak and deliver the message of one's heart. Our kids expressed themselves on different topics through the Talk Master (Elocution) activity.

PARENT'S REVIEW

My children attended 'Sarvayog International School' four years ago in 2017. They absolutely love the school. The school has provided many opportunities to my children. The teachers are extremely friendly, understanding and caring. Also the academic programs are great. Along with the studies, the school also pays attention to other co-curricular activities. This school integrates compassion into their teaching standards, emphasizes the importance of values and builds leaders through each of their classes and lessons. The teachers have truly invested in my children's education and their growth as learners. I feel so satisfied, comfortable and at ease with taking my children to SIS. In the covid-19 situation, the school has made an excellent arrangement of online classes. Through these classes, the students have used much better Technical Platform. These classes exceptionally helped them understanding science and biological concepts with the help of various pictures, graphs, animations and videos. The school has been striving hard to increase the competency, skill and to shape the character of the students during these tough times also. I would like pay my thankfulness to the Principal and staff of the school to make my children so competent, confident and energetic.

Teachers Talk

MOHD TAIYAB KHAN (PGT English) Online Teaching

The economic recession, layoffs, lockdown measures, and the risk of illness caused by COVID-19 make self-employed, remote jobs like online teaching very attractive. Plus, teaching online is a great, realistic way to do your work while making a difference in people's lives all over the world. You can start teaching from any location (home, coffee shop, co-working space) and enroll students from various backgrounds and geographical areas.

Virtually any topic or skill can be taught online, but popular subjects include languages, mathematics, sciences, and humanities. To teach online, one needs to be reasonably comfortable with computers or mobiles and the internet. This is because interactions with students will take place through messaging platforms, email, WhatsApp, Zoom, Google Meet, Teach Mint and video calls. Online teachers need to create digital resources to share with their students, such as PowerPoint presentations, videos, audio lectures, and PDF guides.

The best thing about teaching online is that it's accessible to so many people. As the education expert Elliot Masie, said, "We need to bring learning to people instead of people to learning." Online teaching does this beautifully. Anyone with an internet connection can attend live-stream college lectures, learn a language via video call, or coach themselves through an online video course. Plus, students can participate in interactive discussions through the creation of small groups to examine topics from various perspectives. Online teaching is very beneficial in many ways. It provides a lot of freedom. One doesn't have to wake up early every day if he or she doesn't want to. And if one needs to take time off to look after children or visit family, he or she can – simply arrange his or her schedule to suit his or her needs. Even if someone is hired by an agency he/she is still his/her boss. He/she decides when he/she works and how many hours he/she does. He/she can take holidays whenever he/she wants – he/she is in-charge of his/her time and that's a very liberating feeling.

What's more, someone can get an opportunity to improve one's technical skills. Learning your way around online platforms gives you the confidence to explore other tools and software that could be useful for your sessions. There's also no commute to contend with. You can work remotely from the comfort of your home and avoid wasting time travelling to and from work. Still, probably the best part about teaching online is the students! People who pay for an online teacher are bound to be more motivated and engaged than the average high-school student.

Anyone who teaches an on-the-ground class is looked out into the classroom and sees boredom or disconnection. By comparison, the online students are choosing when to log on to do their work. They seem very tuned in when they do ... I find them, as a group, exceptionally dedicated, motivated, and talented.
